

Remaining Inconsistencies

A review of the game's quiz, minigames, item data and on-screen text. Covers the seven issues still open after the first round of fixes, plus the Nuisance item descriptions.

Review date: September 22, 2026

How to read this report

- **HIGH** changes a player's score or marks a reasonable answer wrong. **MEDIUM** teaches something misleading or reads as broken. **LOW** is polish.
- **DECISION** needs you to pick a direction before it can be fixed. **FIX** has a clear fix ready to apply once you approve the wording.
- Issue numbers match the original review, so they are not consecutive.

At a glance

#	Issue	Severity	Type	Main place to change
3	Ziplock minigame makes you pack Nuisance items	HIGH	DECISION	Ziplock minigame, ziplock question
4	Glow Sticks question also fits Batteries	HIGH	DECISION	Glow Sticks question
N	Nuisance item descriptions sound like right answers	MEDIUM	DECISION	Nuisance item data (Journal)
5	Two questions assume an order, but questions are shuffled	MEDIUM	DECISION	First Aid and Water questions
12	Filipino typos and grammar in quiz text	MEDIUM	FIX	Quiz feedback text
13	Mixed languages and uneven instruction style	LOW	FIX	Minigame instructions
7	Toiletries description describes a container	LOW	FIX	Toiletries item data

Suggested order

Settle #3 and #4 first, since they cost players points for sensible choices. #4 and #12 touch the same Glow Sticks text, so rewrite that question once for both. #7, #12 and #13 can be applied in one pass once the wording is approved.

#3 Ziplock minigame packs Nuisance items

HIGH DECISION

Where

- Ziplock minigame items and instruction: `ZiplockMinigame.cs` (line 16) and `instructionText` on `ZiplockMinigamePanel` in `GameScene`.
- Ziplock quiz question: `QuizManager.cs` line 418.

The problem

- The instruction says “**Put only the important things in the zip lock**”, but the minigame only ends once **all six** items are inside. There is no choice, so “only” means nothing.
- Two of the six items, the **Phone** and the **Power Bank**, are Nuisance items. Packing either in the real go-bag costs **10 points**.
- The question asks how to protect your “*posporo, pera, at gamot*” (matches, money, medicine). Matches are also a Nuisance item, and none of those three things appear in the minigame.

Item in the minigame	Category in the game	Consistent?
Pad and pen	Useful (Pen & Paper)	Yes
ID	Important (Important Documents)	Yes
Money	Conditional	Yes
Batteries	Important	Yes
Phone	Nuisance (–10 points if packed)	No
Power bank	Nuisance (–10 points if packed)	No

Why it matters

The same round tells players the phone belongs in a waterproof bag, then penalizes them for packing it.

Options

- **A (simplest)**. Swap the Phone and Power Bank for items that belong, such as Medication or the Contact Card. Keep “all must go in” and change the instruction to “*Pack the items into the ziplock bag.*”
- **B**. Keep them as wrong choices the player has to leave out. The minigame would then need to check what was packed, which is new logic.
- **Either way**, make the question's list (matches, money, medicine) match what is in the minigame.

#4 Glow Sticks question also fits Batteries

HIGH DECISION

Where

Glow Sticks question and feedback: QuizManager.cs lines 390–393.

The problem

	Glow Sticks question	Batteries question
Scenario	Your flashlight's light is dying. What can replace it?	Your radio and flashlight died because they ran out of power. What makes them work again?
Feedback explains it as	The flashlight has no batteries left (<i>"wala ng baterya"</i>)	Spare batteries keep the flashlight working
Correct answer	Glow Sticks	Batteries

Both questions describe a flashlight running out of power, but only one accepts Batteries.

Why it matters

A player who answers **Batteries** to the Glow Sticks question is making a sensible choice, but is marked wrong and loses the 60% of that question's score that comes from naming the item.

Option

Reword the question so batteries can't help. For example, the flashlight **broke or got wet**, or you need a light that works **hands-free or without any power**. Then Glow Sticks is the only sensible answer. The same rewrite also fixes the Glow Sticks typos in #12.

#N Nuisance descriptions sound like right answers

MEDIUM DECISION

Where

Item data in Assets/Resources/ItemData/Nuisance/. Players read these descriptions in the Journal.

The problem

Nuisance item	Current description	Sounds like the answer to
Candle	"Backup light source when batteries fail."	The Glow Sticks question
Compass	"Helps with navigation if landmarks are destroyed."	The Pen & Paper map question
Phone	"Receives emergency alerts and contacts rescuers."	Contact Card, Radio
Power Bank	"Recharges a phone or radio when electricity is out."	Batteries

Why it matters

A student reads that the candle is the backup light, packs it, and loses 10 points. The Journal ends up teaching the opposite of how the bag is scored.

Options

- **A (recommended).** Keep them tempting, since they are meant as distractors, but add why they are a poor choice. Examples:

Item	Suggested description
Candle	Backup light, but an open flame is a fire risk after an earthquake, when gas lines may be leaking.
Compass	Helps with direction, but only if you already know the way. A drawn map of your route is more useful.

Item	Suggested description
Phone	Useful while it lasts, but it dies without power and signal is often down after a disaster.
Power Bank	Needs charging itself, so it is useless once its own battery is empty.

- **B.** Make the descriptions neutral. Simpler, but teaches less.

#5 Two questions assume a fixed order

MEDIUM DECISION

Where

- First Aid question: QuizManager.cs line 369.
- Water question: QuizManager.cs line 376.
- The shuffle: QuizManager.cs around line 579.

The problem

Question	Opening	Assumes
First Aid	<i>"Nadisinfekt na ang galos."</i> (The wound is already disinfected.)	The wound was cleaned earlier
Water	<i>"...may maruming buhangin ang iyong galos."</i> (Your wound has dirty sand in it.)	The wound is still dirty

Questions come in random order, so the wound can be "already disinfected" before the story ever mentions it being dirty.

Options

- **A (simplest).** Make both questions stand on their own. First Aid could open with *"May galos ka sa braso..."* (you have a wound on your arm) instead of assuming it was cleaned.
- **B.** Always ask First Aid after Water. This works against the shuffle.

#12 Filipino typos and grammar in quiz text

MEDIUM FIX

Where

Quiz text in QuizManager .cs. Suggestions below are for you to check before they are applied.

Where (line)	Current	Suggested
First Aid, correct feedback (371)	...mapasukan ng dumi or ma infect .	...mapasukan ng dumi o ma-impeksyon .
Glow Sticks, question (390)	Napansin mong nawawala wala na ang ilaw ng gamit mong flashlight kung sakaling mapundi ang gamit mong flashlight . Anong gamit pwede mong gamitin magbibigay...	Reworded together with #4, e.g. Napansin mong unti-unting nawawala ang ilaw ng iyong flashlight. Anong gamit ang maaaring magbigay ng liwanag kapalit nito?
Glow Sticks, incorrect feedback (393)	Isama ang glowstick! dahil ito... wala ng baterya ang ilaw o baterya iyong flashlight ...	Isama ang glowstick! Ito ang alternatibong ilaw kapag hindi na magamit ang iyong flashlight sa dilim.
Spare Clothes, incorrect feedback (435)	...nagliligtas sa mga bata laban sa sakit. (<i>The player isn't a child.</i>)	...nagliligtas sa iyo laban sa sakit.
Important Documents, incorrect feedback (450)	...ang kopya ng birth certificate na magpapatunay sa inyong pamilya para sa tulong. (<i>No main verb.</i>)	...ang kopya ng birth certificate ang magpapatunay sa inyong pamilya para sa tulong.
Contact Card, correct feedback (470)	... makaktulong ito sa mga oras na need ng tulong...	... makatutulong ito sa mga oras na kailangan ng tulong...

Smaller slips (optional)

- *maari* should be *maaari* (appears in several places).
- *Nalock* is Taglish.
- Some text says *glowstick* while the item is named *Glow Sticks*.

#13 Mixed languages and instruction style

LOW FIX

The problem

The quiz is in Filipino, but the minigame instructions, difficulty screen and banners are in English, so the language switches between each question and its minigame. The English instructions also don't follow one style:

Minigame	Current instruction	Issue
Water	Fill the cup by tap then hold the water Bottle	Odd capital; "by tap then hold" reads oddly
Ziplock	Put only the important things in the zip lock	Item is spelled "Ziplock" (see also #3)
Canned Food	Open the emergency can food	Should be "canned food"
Whistle	Keep tapping till the rescuer notice you!	Should be "notices" (or "rescuers notice")
Contact Card	Wipe the smudges of your contact card	Should be "off"
Documents	Sort the documents into the designated filename in the folder	"filename" is a computer term
Toiletries	Put the item to its designated holder	Should be "items in their"
Medication	Drag & Drop the pills to sort...	Capitalized unlike the others
All	Some end with "!", most don't	Punctuation varies

Options

- **A.** Keep English and fix the wording and style above.
- **B.** Translate the instructions into Filipino to match the quiz. Probably better for students, but the translations need to be written or approved by you.

#7 Toiletries description describes a container

LOW FIX

Where

Assets/Resources/ItemData/Useful/Toiletries.asset

Current	Suggested
Stores essential cleaning and hygiene supplies.	Soap, toothbrush and other hygiene supplies that help prevent illness in crowded shelters.

The current text was probably copied from Important Documents ("Stores essential documents...").

Appendix: already fixed

These were found in the same review and have already been fixed.

#	Issue	What changed
1	Six quiz items gave no packing credit	Radio, Batteries, Important Documents, Contact Card, Toiletries and Pen & Paper now have Essential Ranks 15–20. Packing is scored out of all 20 requirements.
2	Difficulty screen showed the wrong weight limits	Intermediate and Advanced now say 5kg, matching the game.
6	Batteries description said they “recharge” items	Now: “Powers flashlights, radios and other devices when there is no electricity.”
8	Big Flashlight weighed the same as the Small one	0.2 kg → 0.4 kg.
9	Biscuits weighed 0 kg	0 kg → 0.2 kg.
10	Inconsistent description punctuation	Added missing periods (Medication, Power Bank, Toilet Paper) and the comma in Rope. Gloves shortened to one sentence.
11	Feedback that didn't match its item	Pen & Paper feedback now says “panulat at papel”; First Aid instruction now says “arm”.
14	Leftover difficulty time code	Removed the unused time lookup.

Reference numbers

	Value
Quiz questions	20
Packing requirements (Essential Ranks)	20 (the two flashlights share one rank, as do the two canned foods)
Lightest full essential bag	4.65 kg (4.85 kg with the Big Flashlight)
Weight limit, every difficulty	5 kg
Penalty per Nuisance item packed	10 packing points
